Brand and product design lead with a fine arts background and 16+ years in design. I build brands and digital products from the ground up: at 1inch I joined as the first designer, created the original identity, built and led the design team, set up the design system and art-directed the 2025 rebrand. My work connects brand, product and campaigns, from app flows and launches to events and physical products, and I stay hands-on in UI/UX, motion, 3D and AI-driven production.

Professional Experience

1inch Labs
Jul 2020 - Present

Art Director

DeFi company, remote. Joined as the first designer and grew the design function as the company scaled.

- Created the original brand from scratch: logo, colours, typography, website, landing pages and the first dApp interface.
- Built and led a design team across brand, motion and product, later split into dedicated teams; set creative direction and approved brand and product visuals.
- Art-directed the 2025 rebrand on the 1inch side, in close collaboration with the agency Shuka.
- Led launch campaigns for Fusion, Fusion+, 1inch Wallet, 1inch Card and Aqua; worked on every company marketing campaign, including the Bruce Lee campaign.
- Designed the entire 1inch Wallet app: onboarding, swaps, sending, transaction history and details, WalletConnect, card and settings, keeping complex crypto actions simple for users.
- Designed the 1inch Hardware Wallet end to end as the sole designer (released as ERA Wallet): the device itself, UX/UI for a two-tone E Ink screen, how every interaction looks and works, custom pixel fonts, icons, animation and packaging.
- Built a token-based design system: core colours, graphics, icons and fonts, a Core UI Kit and versioned product libraries.
- Brought AI into production: Midjourney photo style and moodboards for marketing, ComfyUI workflows with trained LoRAs, a video pipeline in Figma Weave, and custom Figma plugins that streamlined the team's work.
- Produced brand guidelines, presentations, token and DAO visuals, conference booths, side events and merch; designed the cover and charts for the 1inch book reDeFine Money.

Astra Studio
Oct 2009 - Aug 2020

Visual Artist / Digital Designer

Digital studio working with advertising agencies and direct clients.

- Designed websites, interactive banners and digital ad campaigns for advertising agencies and their clients.
- Created 2D/3D assets, UI, characters and environments for mobile and browser games.
- Produced motion graphics and animation for ads and games.
- Created logos, websites and complete brand visuals for early crypto projects, years before joining Web3 full-time.

MultiToken
Jul 2018 - Oct 2019

UI/UX Designer (contract)

- Designed interfaces for web-based blockchain and DeFi products.
- Combined clear UX with strong visual design for early Web3 products.

Selected Projects

1inch Rebranding	Art direction, in collaboration with Shuka agency	Case study ↗
Bruce Lee Campaign	Key visuals, event stand, banners, print and merch	Watch video ↗
1inch Wallet app	End-to-end product design of the whole app	App Store ↗
1inch Hardware Wallet	Device design, UX/UI, interactions, fonts, packaging	Product page ↗
